## TOWN WARRANT.

---

### THE STATE OF NEW HAMPSHIRE.

*To the Inhabitants of the Town of Raymond, in the County of Rockingham, in said State, qualified to Vote in Town Affairs:*

[L. S.]

You are notified to meet at the Odd Fellows' hall in said Raymond, on Tuesday, the fourteenth day of March next, at ten of the clock in the forenoon, to act upon the following subjects:

1. To choose all necessary Town Officers.
2. To raise such sums of money as may be necessary to defray Town charges for the ensuing year, and make appropriations of the same, as follows: For maintenance of the poor, for support of schools, for laying out and repairing highways, and building bridges and repairing same, and for all other charges arising within the Town.
3. To see what sum of money the Town will vote to raise to pay the fire company.
4. To see what sum of money the Town will vote to raise for Memorial Day purposes.
5. To see if the Town will vote to make a discount of three per cent on all taxes, except poll taxes, paid on or before June 15, 1922.
6. On petition of Mr. Zeise and fifteen others, to see if

the Town will vote to install street lights on the Harriman road to the residence of Mr. Zeise.

7. On petition of Mrs. Lilla S. Batchelder and fifteen others to see if the town will vote to reconstruct the highway leading from Mrs. Lilla S. Batchelder's residence to the Manchester and Portsmouth Trunk Line, and appropriate money for the same.

8. To see if the Town will vote to accept the invitation from the Town of Chester to join them in celebrating their 200th anniversary, and appropriate money for that purpose.

9. To see if the Town will vote to grant permission to the Raymond Brass Band to erect a band stand on the Common.

10. To see what sum of money the Town will vote to raise for the purpose of coöperating with the State and Federal Government in the control of the White Pine Blister Rust in Raymond.

11. To see if the Town will vote to accept provisions of Chapter 117, Laws of 1917, on section of the Derry-Raymond road and Raymond-Plaistow road, so called, and appropriate or set aside from the amount raised for highway work, the sum of \$250 for this purpose.

12. To transact such other business as may legally come before said meeting.

Given under our hands and seal this twenty-second day of February, in the year of our Lord nineteen hundred and twenty-two.

WALTER J. DUDLEY,  
T. MORRILL GOULD,  
EDWARD F. CRAM,  
*Selectmen of Raymond.*

## REPORT OF HEALTH OFFICER.

*To the Honorable Board of Selectmen of Raymond:*

GENTLEMEN—As Health Officer of the Town of Raymond, I beg permission to submit the following report:

We have been very free from contagious diseases for the past year. No cases of measles, scarlatina, have been reported. We had two or three cases of diphtheria, which is unusual for this town as we have only had two or three cases reported in the last twenty-five years.

No epidemics, as all cases were confined to one or two houses. Our sewerage problem is just as heretofore reported. I think that the inhabitants, as a whole, are awakened to the fact that sanitary surroundings are very necessary to the health of the individual. A few cases of violations have been reported and abated. Our water supply is still good. The last chemical analysis was extremely gratifying. While we may sometime be obliged to move the location of the wells, I feel that, in lieu of the fact that we have no trouble whatever with any disease that could possibly be traced to the water supply, we can afford to wait a while before attempting any radical change.

I would call the attention of the officials to the fact that they should be doubly sure that there are no leaks at the source, and also that the standpipe should be cleaned as often as expedient.

Our death rate is about as usual and nearly all cases from chronic diseases.

All of which is respectfully submitted,

GEORGE H. GUPTILL,  
*Health Officer.*

RAYMOND, N. H., Feb. 1, 1922.

In submitting the annual report of the work of the school at this time, your committee wish to acknowledge the faithful and loyal service of every teacher, official and employee, who have been connected with this institution during the past year.

They wish, also, to acknowledge especially the work contributed by Mr. Eugene J. S. Houle in repairing the baseball

diamond and to state that they hope to continue the work of improving the grounds during the coming spring and ask interested citizens to contribute labor and teams to that end, under the direction of Mr. Baker.

All such contributions will be acknowledged in the next school report.

Respectfully submitted,

RALPH H. SANBORN,  
*Chairman.*

Martha B. Walker.

## Report of the Superintendent of Schools

---

*To the School Board of Raymond, N. H.*

Your present superintendent of schools assumed his duties the first of last September. Consequently he did not have an opportunity during the summer months to study your school system, and get acquainted with its problems. He was faced with a new and difficult situation. He set out to solve the problems which required immediate attention. He took things as he found them, and has worked ever since devoting his entire time and energy to promote the best interests of supervisory union number fifty-three, of which Raymond is a part.

The first event connected with the schools which occurred last fall was the giving of a reception to the superintendent, his wife, and the teachers who, with one exception, were new to the town. That was a most happy thought for it gave us an opportunity to meet the citizens of Raymond. A fine spirit of co-operation, and sympathy prevailed during the entire evening. It is the hope of the superintendent that more such gatherings may be held during the year for, he knows from actual experience, that great benefits are to be derived by helpful suggestions which citizens may make on such occasions.

The most important phase of any school system is what is actually accomplished in the school room. The school room is the field of action where many forces meet in a mighty workshop, so to speak, and either make or unmake the future citizens of our Republic. Recognizing this fact the superintendent has used his influence, skill, and experience, in making the school room function in such a way

as to impart to the pupils the best training possible under the circumstances.

One of the first problems which have been partially solved is that of supervised study. We have succeeded in arranging our time table in such a way as to allow the teaching staff several spare periods a day, during which time, pupils may prepare their lessons for next day, under the direction of a teacher. The superintendent hopes that in the future a teacher may be available every period of the day to be put in charge of this most important work.

While the securing of rank in itself is not the main reason why we send children to school, yet, the rank received is a good indication of actual achievement. The superintendent has frequently met his teachers to discuss thoroughly the methods and principles of an efficient ranking system which should be uniform and give a fair estimate of what has been actually accomplished both by teachers and pupils.

The superintendent has made it his business to visit every teacher at work as often as possible, in order to have first hand information regarding the teachers' work, personality, and results obtained. He does not believe in the lecture method of teaching either in the elementary or secondary schools. Consequently he has recommended the recitation method of teaching the Sciences, English, and Civics which had previously been taught by the lecture method. Direct instruction followed by the active participation of the pupils accomplishes the best results.

The program of studies used previous to this year had reduced the requirements in the English branches to a minimum. Considering the poor spellers and writers that come out of schools in general the superintendent feels justified in having substituted instruction in Spelling, Grammar, and English Composition during the greater part of the time provided in the time table for B and C subjects.

One great handicap that teachers and superintendents in general frequently meet is the lack of permanent records which may give information regarding the standing of every pupil in the school either past or present. The superintendent has made provision, by the purchase of three record books, which were distributed to the various teachers at the head of the different divisions of the elementary schools, for the teachers to record at the end of each term the actual standing of every pupil in their department. These records should be preserved from year to year as well as the high school records for reference purposes, to enable school officials to give definite credentials to pupils seeking admission to other institutions.

It is true that we ought to arrange our school programs in order to meet the college entrance requirements. Let us hope that in the future more of our graduates will continue their education by entering higher institutions of learning. It is our purpose to give our graduates as good a preparation as possible to do higher work. Yet, preparation for college entrance should not be the chief aim of the lower schools. Many young men and women should go to college, and many should not. Not everyone was cut out for a college education. On the other hand every individual should receive a minimum education before undertaking to take his place as a citizen in the community. The minimum educational preparation at the present time should be a high school education. We need schools which will educate all the children of all the people along the lines that nature has fitted them for. To meet these demands in Raymond you ought to retain and improve the Domestic and Manual Arts curricula. Furthermore a Commercial department ought to be added which will train young people along the lines of business. Business efficiency leads to prosperity. Prosperity makes it possible for fathers and mothers to give greater opportunities to their children.

The school facilities of Raymond compare well with any town of its size in the state. The school building is a good one. It is being well used. Considerable laboratory material has been purchased which affords good facilities for laboratory work in Elementary Science, Chemistry, and Physics. An excellent Chemistry table has been added which enables the pupils to work and experiment individually. During the present year also, a fire alarm system has been adopted which may give the alarm in every part of the building in case of fire. Fire drills have been held. The entire student body may vacate the building in a few seconds. Other minor improvements have also been made.

Notwithstanding these assets there is much room for improvement. The greatest problem that must be solved in the near future is that of congestion. This condition has necessitated the use of the superintendent's office for a class room, library, reading room, and supply room. The superintendent has no suggestions to offer at this writing as to how the desired improvements may be brought about. He simply suggests that this problem should be solved soon.

Perhaps there is no school in the state with more attractive grounds and facilities for out-of-door sports than the Raymond school. The manual training class has done some pioneer work in clearing the grounds and making them more serviceable for athletics. In the near future plans ought to be made for a supervised play ground. This will improve the health and vigor of the children, which in turn will lead to better scholarship.

Considerable work is being done by the teachers for the health of the pupils. Hot lunches at a nominal charge are served during the noon hour, under direction of the Domestic Science teacher. Only a small number of pupils have taken advantage of this opportunity. Furthermore the teachers supervise the younger children at play during recesses. The headmaster assisted by the manual training instructor has coached the older boys in baseball and other

games. Last fall a baseball team was organized. Several games were played with neighboring schools. The superintendent hopes that more may be done in the future along these lines for he believes in the doctrine of a sound mind in a sound body.

Punctuality and a sense of responsibility are most valuable characteristics for children to acquire. Are you parents doing your best to teach them these habits? Do you see to it that they attend school on time, and regularly? Do you know where and how your children spend their evenings? Do you look after their physical and moral welfare? Do you take your children out of school just because they are sixteen years old, and send them to work to add a few dollars to the family purse, which perhaps you are not in need of? Do you ever visit school to get in sympathetic touch with your children's teachers? Education is the salvation of the world. It demands the active interest of every citizen in order to get our children ready to live in accordance with the noblest traditions, the best means, and the highest ideals evolved by leaders.

In conclusion the superintendent hopes to make clear the fact that your schools are doing good work, that a marked improvement is being made, and that the requirements of the State Department of Education, as well as those of the local board are being met. He thanks the community, the teachers, and the school board in particular, who have spared themselves no pain and trouble in the interest of the Raymond schools. If we grow and develop in the ways suggested in this report, the time will come when the boy and the girl from small communities like Raymond will enjoy equal educational advantages with the children of greater centers. Let this be our hope!

Respectfully submitted,

VINCENT GATTO,  
*Superintendent of Schools.*

*Attendance Honors.*

Not absent or tardy for the year ending August 31, 1921:  
Julia Clouette; Clara Parker.

MANUAL TRAINING DEPARTMENT.

The following projects have been completed at the Manual Training Shop, from November 15, 1921, to February 10, 1922:

Grammar School; Grades V and VI: hat racks, coat hangers and solitaire boards (under construction).

Junior High School; Class I: hat racks, coat hangers, broom holders, necktie racks (under construction) and one trapper's kit.

— Class II: hat racks, coat hangers and tool racks.

In addition to the projects mentioned in the above list, a bench for the girls' basement, and two targets for the younger boys' playground have been completed.

Class II has devoted most of its time to shop improvements.

The time from September 12, to November 15, was used in the construction of a baseball diamond for the lower grades, and a space large enough for that purpose has been cleared of logs and underbrush.

Respectfully submitted.

RALPH S. STEVENS,  
*Manual Training Instructor.*

The courses of study are printed below for the benefit of people interested in the work of the Raymond schools. These have been approved for the school year 1921-1922, by the State Department of Education.

VINCENT GATTO,  
*Superintendent of Schools.*

#### ELEMENTARY PROGRAM OF STUDIES.

## REPORT OF SCHOOL PHYSICIAN.

*To the Honorable School Board and Superintendent of Schools of Raymond.*

GENTLEMEN:

As School Physician of the Town of Raymond, I beg to submit the following report. I find the pupils, on the whole, in splendid condition. I think that the system of school inspection is bearing fruit by interesting the children in their personal appearance and general health. They are all neat and tidy and show that they are following our instructions as to what a child can do to keep himself in good condition.

As to the teeth: we have a hard proposition, about which to decide; as the first teeth almost invariably decay, and are always lost, and owing to the fact that it is next to impossible to get a young child into the dentist office and almost impossible for the doctor to fix the teeth as they should be fixed, and having to lose them in a few months, I feel that we should concern ourselves more especially with the second dentition.

The pupils of twelve years of age and over have good teeth and show that they are taking good care of them. In our report we are obliged to note a defect if it is only one little cavity, just the same as though the whole mouth was involved.

I have endeavored to call the attention of the pupil to the defects that, in my opinion, calls for immediate attention.

Now as to the tonsils, I find a very few, that calls for operative interference. Almost every tonsil atrophies at the age of twelve or fifteen years, and unless they cause trouble at an earlier age I am not in sympathy with the removal of the organ as a routine practice. If the tonsils interfere with the breathing of the child, have them removed.

In regard to the more important diseases, viz., Malnutrition, Scrofula, Tuberculosis, I find none. I think we have reason to congratulate ourselves on the general appearance of the future generation.

While I think the system of school inspection may be improved I fully believe that the routine examination of the pupils is, as I said before, bearing fruit in interesting the scholar in his general appearance and health. With our fine location, splendid building, a fine corps of teachers, I feel that we are progressing in a very satisfactory manner.

All of which is respectfully submitted.

G. H. GUPTILL,  
*School Physician.*
